

Main Features

DJE-2000

- **Hybrid 2-Way Driver** – for producing clear and more precise audio quality throughout the entire frequency spectrum.
- **Multiple Earphone Tips** – Three Comply™ foam earphone tips (S/M/L) to provide an extremely comfortable fit as well as reduce unwanted external sounds and five silicone tips (XS/S/M/L/triple flange) to accommodate different sizes of ear canals.
- **Detachable Cable with MMCX connector** - Designed for maximum versatility. The cable is applied with a special textile coating that improves durability and reduces tangling and twisting.

DJE-1500

- **Dynamic Driver w/ Adjustable Housing** – for efficient production of a wide frequency range for different types of music listening. Can also be easily adjusted for over-the-ear or conventional fitting.
- **Multiple Earphone Tips** – includes a medium sized Comply™ foam earphone tip for maximum comfort, fit and noise isolation, as well as four silicone tips (XS/S/M/L) to accommodate different sizes of ear canals.
- **Detachable Cable with MMCX connector** – for increased versatility. In addition, several inches of the cable that plugs into the earphone are made of memory-shape resin material to help ensure the earphone stays in place when used in over-the-ear applications.

FEATURES

DJE-2000

1 Hybrid 2-Way Driver

The DJE-2000 is designed with a "hybrid" 2-way driver system for producing clear and more precise audio throughout the entire frequency spectrum. With the use of rare and powerful magnets for its speakers, the larger 9.4 mm driver located in the back of the earphone produces low bass frequencies with impact, while the front driver efficiently generates critical mid and high frequencies so key instrumental sounds DJs pay close attention to, such as snare drums and cymbals, are more pronounced.

Hybrid 2-Way Driver

2 Multiple Earphone Tips

The flagship model includes three Comply™ foam earphone tips (S/M/L) to provide an extremely comfortable fit as well as reduce unwanted external sounds from entering and interfering with the original music. In addition, the model also includes four silicone tips (XS/S/M/L) and one triple flanged silicone tip to accommodate different sizes of ear canals.

Comply™ Tip

3 Detachable Cable

Pioneer provides a detachable MMCX connector for maximum versatility. The cable is applied with a special textile coating that improves durability and reduces tangling and twisting.

DJE-1500

4 Dynamic Driver

The DJE-1500 utilizes a large 9.4 mm driver and CCAW voice coil reinforced by a powerful magnet for efficient production of a wide frequency range for different types of music listening. The diaphragm of the speaker is made of a ceramic powder coating composite designed to reduce internal vibration that can cause distortion to be induced into the original music content.

5 Adjustable Housing

The DJE-1500 is designed for over-the-ear or conventional fitting utilizing a rotatable housing that can easily be adjusted to the user's listening preference.

Conventional Over-The-Ear

6 Multiple Earphone Tips

The unit includes a medium sized Comply™ foam earphone tip for maximum comfort, fit and noise isolation, as well as four silicone tips (XS/S/M/L) to accommodate different sizes of ear canals.

7 Detachable Cable

Pioneer also designed the MMCX connector to be detachable for increased versatility. In addition, several inches of the cable that plugs into the earphone are made of memory-shape resin material to help ensure the earphone stays in place when used in over-the-ear applications.

SPECIFICATIONS

DJE-2000

Form/Driver	Closed/hybrid driver (BA & dynamic)
Impedance	30 Ω
Sensitivity	103 dB
Frequency Response	6 ~ 22,000 Hz
Maximum Input	500 mW
Unit	Mid/High : balanced armature, Low : φ9.4 mm dome
Connection CordOFC litz wire 1.6 m (removable)
Input Connectorφ3.5 mm stereo mini plug (Gold plate, 2-way, screw)
Mass6.1g (cord not included)
Included AccessoriesEarphone tips: Silicone (XS/S/M/L), Comply™ Tx-500 foam (S/M/L), Triple flange (one-size)
Carry case, Cleaning brush, ¼" stereo plug adapter

DJE-1500

Form/Driver	Closed/dynamic driver
Impedance	22 Ω
Sensitivity	105 dB
Frequency Response	6 ~ 22,000 Hz
Maximum Input	300 mW
Unitφ9.4 mm dome
Connection CordOFC litz wire 1.6 m (removable)
Input Connectorφ3.5 mm stereo mini plug (Gold plate, 2-way, screw)
Mass6.1g (cord not included)
Included AccessoriesEarphone tips: Silicone (XS/S/M/L), Comply™ Tx-500 foam (M)
Carry case, ¼" stereo plug adapter
