

MAG AUDIO is a Ukrainian manufacturer of professional audio equipment. The company's history stretches back to 1991, when Boris Khasin established a full-service magnet factory in the small city of Bila Tserkva, about 100 kilometers south of Kyiv. Today, MAG remains a family business, run by Boris' two sons, Leonid and Alexander Khasin.

MAG is short for "magnet", as the company's first foray into the world of sound was through magnets and components for audio systems. However, since 2008 has shifted its focus to professional-grade speakers, with a speciality in tour and cinema sounds.

Over the past 30 years, MAG has transformed from the top European manufacturer of magnets to a world-renowned audio-specialist, with two separate divisions: MAG Audio, which produces speaker equipment for professional grade venues and tours, and MAG Cinema, which is focused on providing speaker systems to cinemas across the world. Today, MAG equipment is installed in more than 120 countries.

The company's slogan, "sounds as designed," explains its distinctive feature: MAG is more about creating, not just producing. Every product is a result of a cooperative brainstorming of clients and engineers, experts from across both Ukraine and Europe. This collaboration is our secret tool to bring innovative sound from conception to reality. To this end, MAG Audio produces their own high and low-frequency drivers based on the company's proprietary technology.

According to the latest updates of the MAG's policies, every client who purchases a large-scale audio system also receives a full training in our equipment and components, ending with an exam. Our confidence in our product also

frees us to offer an up to 10 year warranty on our equipment.

In 2019 the company presented MAG MUST – a revolutionary solution designed to provide a sound at diverse venues, both large and small, suitable for either bar or a stadium. The MAG MUST (Multiple Uniform Sound Technology) is unique in that with the help of scalable equipment – like a compact line array MAG WASP – you can achieve a uniform and optimal sound pressure level throughout the entirety of a venue.

MAG Audio prides itself on its innovation and versatility. Our openness is our key to success – our willingness to listen to creators, hear their ideas, and reverberate that sound to the rest of the world.

Z series was created to deliver the power and professional sound quality into various fixed and mobile installations while keeping budget considerations in check.

Versatile and reliable speakers with sharp looks, passive and powered Z series are available for FOH applications as well as for fixed installation and stage monitoring purposes.

Featuring low-wear cabinet coating, high-quality components and thoroughly worked out sonic performance, Z series' speakers compete with speakers way beyond their price range.

To achieve such combination of high performance, optimal sound quality and strict budget constraints, Z series systems were carefully optimized to remain only with performance-critical components and features: low-resonant birch plywood cabinets, reliable Neutrik speakON connectors and MAG Audio transducers known for long-term reliability.

Powered Z series' speakers offer new level of usability and convenience with built-in presets and remote system control via dedicated software suite and Bluetooth connection.

With comprehensive range of mounting and transportation accessories, Z series is all-purpose solution to various sound reinforcement projects of mobile professionals and small to mid-sized venues.

Z control is the dedicated software suite designed to unleash the full potential of Z series speakers. Used in conjunction with Bluetooth control interface available in powered speakers, Z control is an easy tool to set up and monitor performance of your Z series installation.

Main screen allows for fast detection of near-by Z series units, remote volume control, preset switching, and level monitoring, along with information, including processor temperature and actual mains voltage.

Software suite controls built-in user 4-band parametric equalizer to adjust to

the properties of the venue. Options include peaking, low-shelf and high-shelf filters with adjustable bandwidth and up to ± 15 dB of gain, and polarity switch.

Additionally, Z control offers several utility functions: Automatic OFF switch for power saving, cooling fan mode to reduce background noise when there is no

signal, and Noise function to locate Z series units.

Firmware update function helps to keep systems up to date as new functions and improvements are constantly added.

Z control is a free suite available for download from MAG Audio website.

NX full-range cabinets are based on top-line low-distortion neodymium transducers and high frequency drivers fitted with demodulation rings and copper caps, allowing for prolonged high-SPL operation while preserving clarity and intelligibility.

Powered cabinets employ state-of-the-art amplification from Powersoft® and provide ease of use with built-in carefully adjusted presets. Passive NX speakers are fitted with low-distortion crossovers with optimal transfer characteristics, allowing for controlled tuning with external amplification.

Durable birch plywood cabinets are ready to face harsh touring usage. Optionally available weatherproof treatment extends usability into extreme environmental conditions, including theme parks, skating rinks, and swimming pools.

With outstanding performance and high reliability, NX series is designed to meet demands of various applications, where uncompromised sound quality is a must.

NX series represents solid and powerful full-range solutions for fixed installations as well as demanding mobile sound applications.

Sting 8 - 114

Sting 8 - 74

Truly a milestone in MAG Audio lines of compact versatile speakers, STING series combines performance, ease of system integration and user friendliness, making it a highly flexible powerful system for portable and installation purposes.

Integrating two 8-inch neodymium woofers with 1,5-inch neodymium high frequency driver into a perfectly coherent point source design, STING 8 delivers focused directivity and pristine sound power for most demanding applications.

Looking for even better control? With rotatable horns providing different dispersion STING 8 puts your sound right where it belongs without sacrificing power, smooth response or reliability.

Mounting accessories were carefully designed to put the user in charge of installation, not the other way around. Speaker stand adapters, vertical and horizontal brackets and ceiling adapters fit STING 8 everywhere from concert halls, clubs and theaters to theme parks and sports arenas.

MAG Audio SUBWOOFER line consists of versatile low-frequency reinforcement compatible with several full-range series. The line offers convenience in both passive and powered versions.

Subwoofers are based on the next-generation transducers with reinforced moving system, which makes them capable

of withstanding tremendous excursion while keeping distortion in check. To meet the demands of modern projects, thorough

overhaul of low-frequency amplification concept was required.

Cabinets went through careful optimization for most output, least vent noise, and least weight and size. In addition, to withstand extreme weather, the MAG Audio SUBWOOFER line offers a weather-resistant option.

AIR series is a comprehensive range of installation-dedicated speakers, backed-up with various mounting hardware options, including weatherproofing capability.

AIR series benefits from truly point-source design based on coaxial and full-range speakers, which opens a new dimension for speaker placement to achieve best possible coverage while keeping sound system visual imprint to the lowest possible minimum.

From the smallest 6-inch to powerful 15-inch cabinet, AIR speakers have special interior-friendly shape that allows achieving most performance per the space occupied. Carefully optimized enclosures and specifically designed drivers are made to be extremely reliable for many years of trouble-free usage.

Together with installation subwoofers, AIR cabinets are capable to deliver significant sound pressure required by modern clubs, bars, entertainment centers, malls, and open-air theme parks. With that in mind, speakers' design from transducers impedances, internal crossovers to wire terminal were optimized for each installation to be convenient and budget-friendly.

CLUSTER

series

Installation

- Cluster Q
- Cluster Q4
- Cluster Q8
- Cluster S15

Covering the demand for high-pressure systems for night-clubs, concert halls, and sports arenas, Cluster series introduces the power of arrayable speakers into the realm of fixed installation.

Inheriting the best features of reliability, sound performance, and ease of control from touring and mobile sound, Cluster series is augmented with convenient mounting hardware solution for quick setups and perfect fit into the architectural designs.

Cluster Q, Q4 and Q8 along with Cluster S15 subwoofer is a unique installation line array system with integrated mounting capabilities, providing a flexible tool for systems engineer to

introduce uniform coverage into each and any of sound projects. With convenient options for wiring and amplifier connection, Q, Q4, Q8 and S15 can be used to accurately steer the sound field for even the most difficult acoustical conditions.

Cluster series are optionally available as waterproof, and can be used with installation subwoofers to deliver a complete package of in-house sound system for a sound-pressure demanding high-profile projects.

FIELD

SERIES

Installation

FD-52

FD-S15

Field series' design allows for easy coupling allowing engineer to create a tailored solution for the best coverage and clarity in clustered distributed systems domed stadiums, arenas and other large open air spaces.

With comprehensive range of mounting accessories engineered for permanent installation, Field series is prepared to deliver controlled sound into the most difficult installations.

FD-52 is a coaxial positioned horn-loaded 15" and 1,5" HF driver speaker in weather-resistant IP 55 enclosure. Available with wide selection of HF horn providing various coverage patterns, FD-52's are versatile for long-throw and short-distance applications alike.

FD-S15 is a hybrid-horn subwoofer extending operation of Field series for trully full-range applications. Compatible IP55 enclosure allows to integrate FD-S15 straight into a FD-52 clusters for convenience of system engineering, deployment and amplification.

Field series is a range of all-weather installation series specifically designed for stadiums, sports arena and other open air locations, where speakers are exposed to critical weather conditions throughout the year.

VerA M

POWERED SPEAKER
SET

Following the success of plug & play powered speaker sets for mobile professionals, DJs and small venues, VerA M speaker set offers a premium package of power, sound pressure and usability.

VerA M is a great solution for DJs and entertainers looking for punching power and pristine clarity in a lightweight and compact solution. With two effective 15" subwoofers and two quad 6-inch satellites, VerA M is a fit for small concert, bar or entertainment hall.

Equipped with premium Powersoft® amplifiers providing enough power headroom and full protection, VerA M

is ready to shake the house with ready presets right out from the box.

Compatibility with VESA mounting brackets and precise dispersion control extends usability to include delay lines, front-fill and balcony coverage.

VerA M series is supplied complete with stands, transportation bags and cables, promptly delivering on "out-of-the-box solution" promise.

VerA M

Powered speaker set

Frequency Response (-10dB)	42 - 20000 Hz
Max SPL (calculated)	133 dB (one subwoofer + one satellite)
Subwoofer transducer	15", 4" VC (one subwoofer)
Satellite transducers	4x 6", 1,75" VC; 1", 1,75" VC (one satellite)
Nominal Coverage Angle (H x V)	60°-90° x 40° with coverage control (per side)
Total system power	6000 W
Amplifier channels	1500 + 1500 W (per side)
Amplifier	Class D, fan cooling, DSP with phase-linear FIR
Input sensitivity	0 dBV (1 V RMS)
Connectors	XLR input, XLR output, Powercon mains
Connections and physical – satellite speaker

FLY

series

Powered

Fly 6

Fly Sub 12

Fly Sub 15

Fly Sub 18

Fly 6 is a compact powered line array specially designed for use in small concert halls, theaters and clubs, where the features of line array are needed.

Based on new neodymium drivers, Fly 6 sets new standards in relation between size, power and sound. Structurally Fly 6 has a closed box with 4-frontally loaded 6-inch neodymium transducers and 2-neodymium 1-inch HF drivers loaded on the waveguide. Each speaker is powered by Powersoft® four-channel digital amplifier module with high-tech DSP.

Due to its design and large accessories selection, this system is easy to use and has many installation options: suspension - up to 3 modules; ground-stack - up to 2 modules. System can be mounted on a stand or adapter, etc.

Fly 6 is reinforced by a comprehensive range of subwoofers: dual 12-inch flyable Fly Sub 12, versatile dual 15-inch Fly Sub 15, and ultimate dual 18-inch Fly Sub 18.

WASP

Line Array

**Passive
line array modules**

WASP-8

WASP-8i

Arrayable subwoofers

WASP-S12

WASP-S18

WASP line array is the pinnacle of MAG Audio technology ready for next-generation precisely controlled sound spaces. Scalable philosophy behind WASP allows to use it in small installations as well as in large-scale touring and concerts.

Incorporating tailor-designed neodymium components, WASP is built with extra headroom for pristine clarity and powerful impact. Two 8-inch woofers and precision 1,4-inch driver feature improved voice coil cooling for prolonged operation at immense sound levels. Blending them with proprietary JD-lens coupling allows for precise aiming and beam compression control.

Available in both wide coverage and far throw configurations (easily convertible with interchangeable couplings), WASP line array covers distances up to 100m, previously possible only to much larger systems. Such versatility enables to scale WASP system everywhere from small events, bars and restaurants up to touring, arenas, and open-air concerts.

Aiding to WASP's operation scope are compact WASP-S12 and WASP-S18 subwoofers with ground stacked or flown installation, enormously optimizing rental stock and shipping process.

With complete AMPRACK amplification solution and GLL's for EASE Focus 3 calculation software, WASP line array is a must for touring and rental providers offering well-designed services for modern diverse and demanding applications.

FOCUS

stage monitors

Stage Monitors

Focus 5

Focus 5A

Monitor Subwoofers

Focus Sub

Focus SubA

Focus stage monitors feature coaxial low-profile design that providing perfect phase coherence and clear focused sound picture in front of a performer.

The series includes top-class monitors Focus 5, Focus 5A as well as Focus Sub and Focus SubA subwoofers. Almost reference sound quality of the monitors even in passive crossover mode allows to use them as all-purpose systems, with a pole mount adapter conveniently provided.

Special 15" Focus Sub boosts versatility of Focus monitors even more: it creates powerful monitor set for a drummer together with Focus 15, or can be used for DJ monitoring and even FOH using distance pole adapters. Besides pristine sound quality and reproduction purity, we have paid much attention to appearance and ease of use. Modern look, rigid grill backed with acoustic foam, light weight and stable design make Focus monitors comfortable and practical in small installations as well as in big concert tours.

Massive rubber feet were introduced to reduce the slipping around the floor, while mechanical multi-position raisers allow to change the angle for perfect aiming.

Neutrik speakON connectors are placed on both sides of cabinet, making it convenient to create monitor chains. Bi-amp connection allows for precise performance control when used with AmpRack ready touring solutions featuring simple to used presets.

AmpRack 1X8

AmpRack 2X8

AmpRack 2X604

Line of touring-ready rack solutions, fitted with presets for various MAG Audio systems, and designed to provide a seamless integration and convenience.

Based on premium amplification from Powersoft®, AmpRack series offers great level of usability in terms of accepted input power ranges, connections, protection, and remote system control with dedicated software suite.

Customizable signal and distribution device may be built according to the user's specifications, and offers wide selection of available inputs, digital signal and control connectivity, power routing, and additional functionality.

Assembled in touring-grade rack-box with heavy duty castor wheels and front and back covers, AmpRack series is ready to hit the road along with different sets of MAG Audio systems.
